

The Department of Ichthyology and Aquatic Environment of the Faculty of Agricultural Sciences, University of Thessaly offers internships for the undergraduate students, implemented under the Operational Program "Education and Lifelong Learning" (NSRF 2007-2013). The internship is administered by the University. It follows the principles below:

- It is part of the students's curriculum, (program courses).
- It is mandatory for graduation and it is included in the Degree transcript.
- It has 6 ECTS.
- Its duration is four months. It takes place during the summer months (July and August).

Students that have completed their sixth semester are required to undertake a two months internship (July and August) in Government Departments of Fisheries. The students who complete the eighth semester are required to undertake a two months internship in the aquaculture industry (both public and private).

- The Scientific Coordinator assigns the supervision of the internship to staff members that is approved by the Departmental Meeting for each academic year.
- Throughout the duration of the internship, the supervisors are responsible for the monitoring, mentoring and evaluation of students and they evaluate the participating establishments.
